

Under The Sky In California

Charles Francis Saunders

This is a 1913 travelogue by a then-well-known botanist who wrote many books about the American Southwest and California in particular. This popular book went into three printings. "...the main concern of the author has been to draw attention to an immensity of almost unexplored mountain, desert, canon and flowery plain,... This is the real California.... Like all genuine things, it has the compelling charm of the primitive and to the lover of the unartificial it appeals with freshness and power."
